

## Iteration 2: Release Plan Summary

### Note

The top row lists Number, Feature/Requirement, Inception, Iterations 1, 2, and 3, and Transition. The Number and Feature/Requirements

column information is provided in your backlog. The numbers and tasks must match the backlog information. Once this information is inputted into your release summary chart your team will determine what iteration the tasks will be completed and how many hours are needed to complete each task.

~~Each group should expect to work 8 person days (PD) per week. A reminder that 1 person day is equal to 8 person hours.~~

### Colour Coding

Number	Feature / Requirement	Inception	Iteration #1	Iteration #2	Iteration #3	Transition
		Due:	Due:	Due:	Due:	Due:
201	Connected Login/Register page with Artist Profile Page			1		
202	Designed wireframe for creating Artist Profile Page			0.5		
203	Built functionality for Artist Profile Page using React			1.25		
204	Developed backend APIs for profile creation (Node.js)			1.25		
205	Setup database tables using MongoDB to store artist data			1		
206	Performed manual testing for profile creation			0.25		
207	Built functionality for Edit Post using React			1.5		
208	Built functionality for Edit Profile using React			1		
209	Developed UI for Edit Profile using React			1.5		
210	Developed backend APIs for profile editing (Node.js)			0.25		

211	Setup MongoDB tables for profile updates			0.25		
212	Performed manual testing for profile editing			1.5		
213	Built functionality for Post Creation using React			1.5		
214	Developed backend APIs for post creation (Node.js)			0.5		
215	Set up MongoDB collections for posts			0.25		
216	Manual testing for post creation done			0.5		
217	Designed wireframe for Landing/Home page			1.25		
218	Developed UI for Landing/Home page using React			1.25		
219	Developed backend APIs for Landing/Home page (Node.js)			0.25		
220	Manual testing for Landing/Home page is completed			1.5		
221	Integrated front and backend for Profile Creation			1		
222	Integrated front and backend for Post Creation			1		
223	Integrated front and backend for Edit Profile			1		
224	Integrated front and backend for Landing/Home Page			1.25		
225	Designed and develop UI for Post Deletion (React)			1		
226	Built post deletion feature with Node.js			0.5		
227	Developed backend APIs for post deletion			0.5		

228	Set up MongoDB collections for post deletion			0.5		
229	Unit and integration tests for post deletion is completed			1		
230	Use Case Diagram and descriptions completed			1		
<b>Work Effort in Person Days (PD)</b> 1 PD hour equals 4 hours		0	0	108	0	0
<b>Total Project Hours</b>		108
