Iteration 3 Backlog

Number	Description	PD est.	By
\multicolumn High Priority			
Iteration 3			
301	Design wireframe for Artist Search page, including filter functionality based on location.	1	TM
302	Design wireframe for Artist Profile page, including availability toggle (Yes/No).	0.5	TM
303	Design wireframe for Collaboration Requests page, displaying collab requests for indie artists(individual collab request) .	1.25	TM
304	Develop user interface for availability toggle functionality (Yes/No) for artist profiles using React.	1.25	NJ
305	Implement location-based artist search filter for users using React.	1	NJ
306	Create and deploy backend API to manage availability status using Node.js.	0.25	SK
307	Create and deploy backend API to filter searches for artists based on location using Node.js.	1.5	SK
308	Build the Collaboration Request feature for artists using React.	1	NJ
309	Integrate frontend and backend for collaboration features using Node.js and React.	1.5	SK
310	Implement notification system to inform artists of all types of requests using Node.js.	0.25	SK
311	Perform manual testing on availability toggle feature.	0.25	All
312	Perform manual testing on location-based search functionality.	1.5	All
313	Perform manual testing on collaboration request feature.	1.5	All

Number	Description	PD est.	By
\multicolumn Medium Priority			
314	Design wireframe for Collab Requests List Page.	0.5	TM
315	Design enhancements for side navigation bar.	1.25	TM
316	Develop APIs for collaboration management using Node.js.	1.25	SK
317	Develop artist-specific individual collaborator list using React.	0.25	NJ
318	Develop artist-specific group collab list using React.	1	
319	Create view for artist profiles, including toggle availability status using React.	1	NJ
320	Develop artist search results page using React.	1	NJ

	Low Priority		
321	Develop user interface for the Artist Search page for improved usability.	2	TM
322	Update user interface for the Collaboration Requests page.	2	TM
323	Create backend logic to store collaboration requests.	1	SK
324	Create backend logic to retrieve collaboration requests.	2	SK
325	Develop the notification system to include different notification types.	1	SK
